EXPERIMENT 11

Deploying a Zoho Creator Application from Development to Production Environment

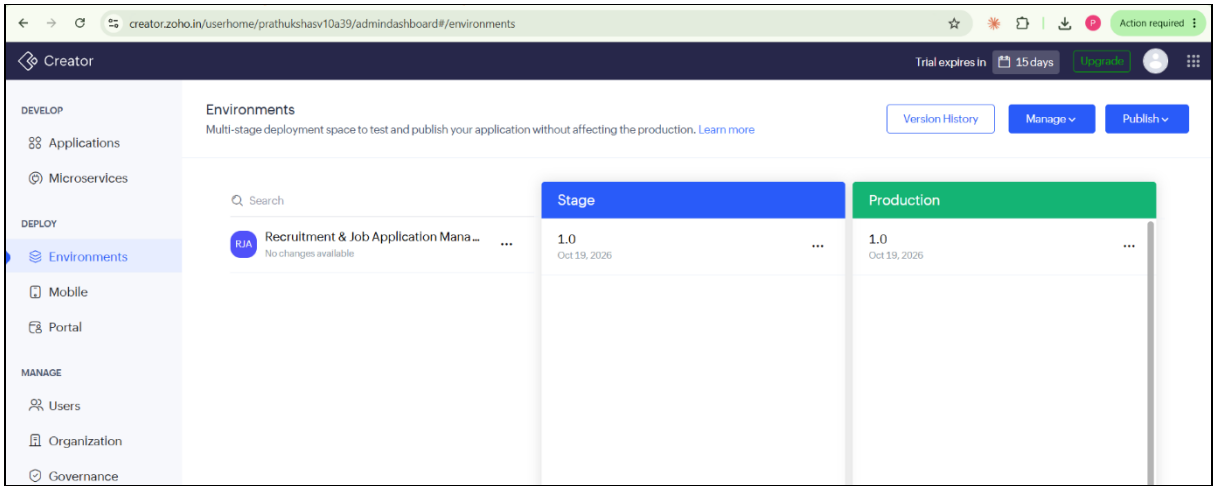

Application: Recruitment & Job Application Management

Aim

To deploy the Recruitment & Job Application Management application from the Development environment to the Stage and Production environments in Zoho Creator.

Procedure

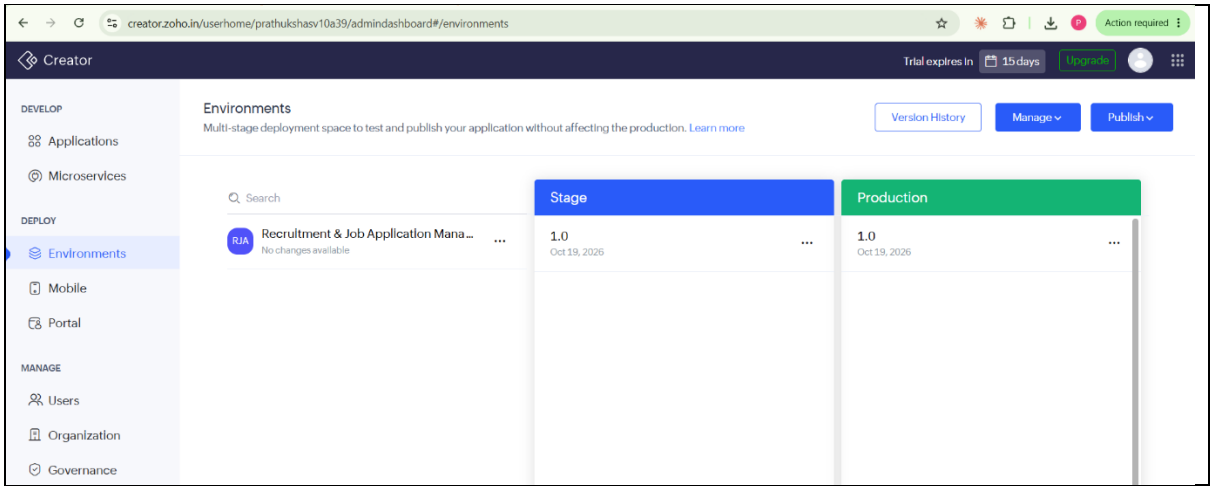

1. Sign in to Zoho Creator. In the left menu of the home page, click **Environments** under Deploy

Environments page in the left menu

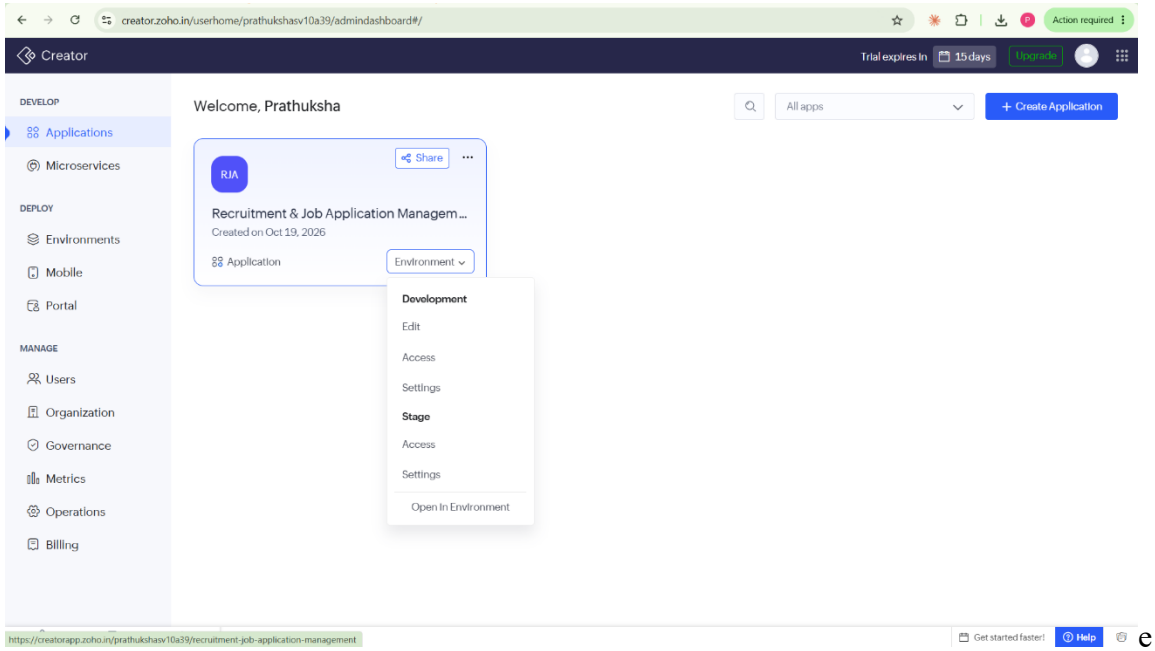

2. Click **Add Application**. Select the application **Recruitment & Job Application Management** and click **Add**

3. The application is listed on the Environments page. Its Stage version and Production version are shown

Application with Stage 1.0 and Production 1.0 on the Environments page

4. Click **Applications** in the left menu. On the application card, open the **Environment** drop-down. The Development, Stag

e and Production environments are listed.

Result

The application Recruitment & Job Application Management was added to the Environments page. Its Stage and Production versions, 1.0, were created from the Development application, and the three environments are listed on the application card.
